

MILLENNIUM SYSTEMS DESIGN, INC.

Brilliance with the Touch of a Button

March 9, 2015

Millennium Systems Design Inc. engineers, designs and installs high end custom home theaters for clients of discerning taste. There is a lot of thought and careful engineering that goes into each of our projects. Quality and attention to detail is paramount and cannot be compromised. For the build out of our theaters, we use Rob Hensen and his team at Central Florida Custom Carpentry exclusively. Rob has taken some of the most difficult and challenging Theater designs and made them a reality. His attention to detail and craftsmanship is unparalleled in Central Florida. A true professional and a valuable resource for us, we are proud to call Rob a critical part of our team when we design and build a client's dream Theater.

Rob Jones
